Atlantic Station-Carter Management LED Fixture Installation

BEFORE ~3 Foot Candles

AFTER ~16 Foot Candles

“Prior to installing Low Bay Fixtures from LED Light Technology we were using 175 Watt High Pressure Sodium fixtures. We replaced them with 78 Watt LED fixtures, reduced the energy used by about 60 percent and eliminated maintenance saving us both time and money. This change allows us to focus on more important projects than changing light bulbs and ballasts. Also, the color of the LED light is very pleasant and much brighter than before. We are pleased to support LED Light Technology and their mission to provide cost-effective and environmentally friendly LED light fixtures.”

– **Joel Ward, Chief Engineer–Carter Management, Atlantic Station – Atlanta, Georgia**
